- ✓ Fun giveaways
- ✓ Your **chance to win:**

Icuiti™ DV920 Digital Video Eyewear

See portable video content on a virtual 42-inch LCD screen!

ALRT Monitoring System

- ✓ Helps you monitor the health of your systems **24x7** from 'outside' your network.
- ✓ Generates feedback that ranges from green light/red light status to various operational states in-between so your IT staff can **respond to events as they are happening, NOT after an interruption** ripples through the network and grinds your organization to a halt.
- ✓ Alerts you when there's a problem.
- ✓ Gives you the data you need to **proactively address system issues** before they become major problems.

ALRT Monitoring offers you thorough coverage, **PLUS** it's **cost-effective**. While many custom monitoring solutions require a significant capital investment, ALRT can be budgeted as a **monthly expense**.

With ALRT tending to your systems, you can develop strategies to keep your organization running smoothly every day of the year.

Just one more way we're creating technological calm™ for law firms nationwide.
